

JUNIOR FABRIZIO HUAMAN ROJAS

Data Engineer | Analytics & Applied AI

juniorhuamanro@gmail.com | +34 661-183-711 | [Linkedin](#) | [Github](#)

SUMMARY

Systems Engineering graduate from the University of Lima (Top 30%) with hands-on experience building data models and pipelines in an analytics engineering role. Strong foundation in SQL, Python and cloud data platforms, with a growing focus on applying AI to turn raw data into systems that reason and communicate from ML driven forecasts to natural-language interfaces over live business data. Detail-oriented, comfortable with steady technical workloads, and committed to building reliable, well-tested data structures.

EDUCATION

Universidad de Lima (UL) — B.Sc. in Systems Engineering

April 2019 – December 2024

Ranking: Upper Third (Top 30%)

EXPERIENCE

Koala Home — Analytics Engineering Intern

Jan. 2025 – Dec. 2025

Lima, Peru

- **dbt Model Development:** Engineered and maintained data models within Snowflake following the Medallion architecture, expanding the analytical layer to support emerging business needs from Commercial and Operations teams. Managed all code changes through GitHub to ensure collaborative and organized development.
- **Business Logic Implementation:** Translated complex requirements into scalable SQL transformations, creating new logic to unify distinct data sources (Odoo & Shopify) and ensure metric consistency.
- **Dashboard Development (Looker):** Built and maintained interactive dashboards in Looker, developing the underlying LookML code (views & explores) to visualize these new models for stakeholders.

PROJECTS

Stock Planner AI — Conversational Inventory Assistant

Personal Project, 2026

- Built an end-to-end pipeline on a public retail dataset: dbt staging models and marts on BigQuery, plus a BigQuery ML 14-day demand forecast.
 - **Outcome:** Designed a tool-calling agent (Claude API) that autonomously selects between data-retrieval tools based on the user's question and grounds every answer in live warehouse queries, delivered through a Streamlit chat interface for plain-language inventory questions.

CERTIFICATIONS

- Google Data Analytics Certified
- Machine Learning Specialization

SKILLS & TOOLS

- Data Manipulation & Profiling: Python, SQL, R
- Excel – Advanced
- Cloud & Data Platforms: AWS S3, Snowflake, BigQuery, dbt
- AI/LLM: Anthropic Claude API (tool-calling agents), BigQuery ML
- Git version control
- Dashboards: Looker, Tableau, Power BI

LANGUAGES

- English — B2
- Spanish — Native
